 WATERWAY: SNAKE RIVER

EFFECTIVE: 01/08/2015 06:00 thru 01/15/2015 17:00 PST

Snake and Clearwater Rivers Channel Maintenance

Channel Maintenance Scheduled at Ice Harbor Lock, Port of Clarkston, Port of Lewiston and the Snake & Clearwater Confluence
January 8 – February 28, 2015

Channel maintenance for the Snake and Clearwater Rivers will occur from 6 a.m., January 8, 2015 through February 28, 2015.

Starting at 6 a.m., January 8, the contractor will begin installing water quality monitoring buoys below the dredge locations. Dredging will commence at 12:01 a.m., January 12 as a 24 hour operation, including weekends, ending on February 28. Please refer to the table below for maintenance locations and dates.

Mariners are urged to use extreme caution in the locations described below and to transit at the slowest safe speed to minimize wake production. Mariners are to proceed with caution after passing arrangements have been made. The dredging vessel can be contacted on VHF-FM Channel 13 or 16.

Location	River Mile	Date
Ice Harbor Lock	Snake RM 9.5	12 - 15 January
Port of Clarkston	Snake RM 137.9-139	12 January -28 February
Port of Lewiston	Clearwater RM 1-1.5	12 January -28 February
Snake & Clearwater Confluence	Snake RM 138 to Clearwater RM 2	12 January -28 February
Disposal Location	Snake RM 116	12 January -28 February

Ice Harbor Lock will be operational during the planned dredging operations; however mariners should expect delays while the contractor is working in the channel. Vessels must coordinate with the Ice Harbor Control Room at (509) 543-3231 or navigational channel 14 in advance of the lockage. This allows the contractor time to move the mobile plant and other equipment in and out of the work area. The Ice Harbor Lock should return to normal operations as of 5 p.m., January 15, 2015.

Your cooperation in this matter is greatly appreciated. For additional information, please call Operations Division.
