LOCK(S): SN 04

EFFECTIVE: 12/17/2019 10:00 thru 12/20/2019 10:00
PST

LOWER GRANITE NAVIGATION POOL TO BE LOWERED

Due to concrete work on the spillway at Lower Granite Lock and Dam, the elevation of the Snake River upstream of the Dam will be lowered to elevation 734.5, which is 0.5 feet below the current target pool elevation of Minimum Operating Pool (733.0) + 2 feet. This pool elevation is expected to be maintained for 18-19 December to complete the work. If needed, the pool may be lowered and additional 0.5 feet to reduce water in the work site to elevation 734.0, though that elevation is not currently predicted as a work requirement.

It is expected that a pool elevation of Minimum Operating Pool + 2 feet (735.0) will be restored by the morning of 20 December.

PROJECT AFFECTED: Lower Granite Lock and Dam – Snake River Mile 107.5

For additional information on this work contact the Lower Granite Chief Operator at (509) 843-2231.
