**THIRD AMENDMENT TO:
2020 WALLA WALLA DISTRICT ANNUAL NAVIGATION LOCK MAINTENANCE OUTAGE**

The annual maintenance lock closure for Walla Walla District, Corps of Engineers continues to be affected by the COVID-19 outbreak. While most maintenance work has proceeded as planned, some contract work and inspection work was disrupted as the District implemented new policies to mitigate the spread of the virus.

Below is tabulated the current status of the District Navigation Locks, with the current estimated return to service date and time for those that are currently out of service:

Project	Location	Status
McNary	Columbia River Mile 292	Returned to Service, 3/20/2020 at 1602
Ice Harbor	Snake River Mile 9.7	Closed. Estimated Return to Service, 3/30/2020 at 1800
Lower Monumental	Snake River Mile 41.6	Returned to Service, 3/22/2020 at 1130
Little Goose	Snake River Mile 70.3	Closed. Estimated Return to Service, 4/3/2020, at 1800
Lower Granite	Snake River Mile 107.5	Returned to Service, 3/20/2020 at 1500

The estimated return to service date and time for Little Goose may be optimistic; high winds at the navigation lock can disrupt the necessary crane operations that will allow the lock to reopen. If significant delays are encountered, navigation stakeholders will be notified thru this forum.

For additional information regarding Walla Walla District maintenance you may contact call Operations Division, at (509) 527-7364.
