**INCREASED LOCKAGE TIME AT MCNARY NAVIGATION LOCK**

Project staff and a contractor will perform testing and evaluation of a new culvert unwatering system at the McNary navigation lock. The work will require placement of bulkheads on both sides of fill valve #3, and will result in that valve being inoperable from 1200 3 August 2021 to 1200 5 August 2021. During this timeframe, lockages are predicted to require an additional 15-20 minutes to complete.

Project affected: McNary Lock and Dam, located at Columbia River Mile 292.

For additional information contact the McNary Chief Operator at 541-922-2231, Call Sign: WUJ41 or NWW Operations Division at (509) 527-7364.
